

William Burkert

IT Technician / Front End Developer | 07973794171 | Willburkert96@gmail.com

Technical Skills

Infrastructure & Cloud: M365, Active Directory, Group Policy, Windows Server 2008 - 2025, Sharepoint / Onedrive, Entra, Intune, Azure, Exchange, User & Group management

Network & Systems: Cisco & Aruba configurations, VLAN Management, System Backups / Recovery, DHCP & DNS, Router & Switches

Management & Support: Project Leadership, Helpdesk & IT Operations (Solarwinds & Auto Task), Troubleshooting

Programming: HTML, CSS, Javascript, JSON, Powershell

Developer Projects

Portfolio: <https://hybrid965.github.io/portfolio/>

- Portfolio website that shows all the developer projects i have completed as well as all the skills i have learnt during my time at South Staffordshire college.

The Cocker Spaniel: <https://hybrid965.github.io/the-cocker-spaniel/>

- Informational static webpage coded in html & CSS dedicated to the cocker spaniel breed

Loyal Paws Art: <https://hybrid965.github.io/loyal-paws-art/>

- Commissioned website for local UK pet portrait artist. Coded in HTML, CSS and Javascript. Features include fade in animation when the viewport comes into view, form validation and portfolio pictures rendered through a JSON file.
-

Infrastructure Projects

OneDrive Migration: Led the migration of company data to OneDrive, ensuring a smooth transition with minimal disruption to end-users. Provided post-migration support and training to staff, enhancing collaboration and data accessibility.

SharePoint Integration: Successfully managed the migration to SharePoint, including planning, configuration, and user training. This project improved document management and facilitated better team collaboration across departments.

Intranet Site Creation: Designed and developed an internal intranet site to centralize company resources, improve internal communication, and streamline access to essential documents and tools for staff.

Meeting Room Scheduling System: Developed a custom meeting room scheduling solution, automating bookings and improving space utilization. The project involved scripting and coding to integrate with existing office tools.

Health and Safety Auditing System: Created a comprehensive health and safety auditing system using the Safety Culture application. Enabled reporting of near misses and accidents via iPads and mobile devices, which automatically generates detailed reports for SLT (Senior Leadership Team) members, streamlining compliance and decision-making.

Professional Experience

IT Technician - Dover Port

February 2026 - Present

- Critical Infrastructure Support: Deliver 1st and 2nd line technical support for 500+ users across a diverse 24/7 estate, ensuring zero downtime for landside and maritime operations.
- Systems Administration: Managed user lifecycles, security groups, and permissions within Microsoft 365, Azure AD, and Active Directory.
- Hardware Deployment: Orchestrated full-lifecycle management of ruggedized operational tech, high-spec workstations, and mobile devices (MDM) across multiple terminal zones.
- Network Maintenance: Diagnosed and resolved complex connectivity issues involving TCP/IP, VLANs, and industrial Wi-Fi access points in a challenging maritime environment.
- Security & Compliance: Maintained strict adherence to port security protocols, ensuring all endpoint devices remained patched, encrypted, and compliant with UK maritime regulations.
- Incident Resolution: Consistently met and exceeded SLAs by utilizing ServiceNow to prioritize and resolve high-impact outages.
- On-Site Logistics: Manage IT assets across the entire port footprint, requiring rapid physical response and technical troubleshooting in operational areas.

Assistant Network Manager - The Norton Knatchbull School

April 2025 - November 2025

- Managed all core network services and devices, including routers, switches, firewalls, Wi-Fi access points, and VPNs, ensuring high availability and secure connectivity.
- Executed complex network changes, configurations, and upgrades, diagnosing and resolving issues related to connectivity, performance bottlenecks, and security incidents in a timely manner.
- Administered hybrid cloud infrastructure daily, utilizing Active Directory, Azure, Intune, Group Policy, and Office 365 to manage user access, permissions, and system configurations.
- Enforced timely patching and updates across all servers and network devices, and maintained accurate and current network documentation.

Senior IT Analyst - Thanet Earth

April 2022 - April 2025

- Managed and supported all IT operations, overseeing helpdesk functions
- Administered and secured hybrid infrastructure, including Active Directory, Azure, Group Policy, Intune and Office 365 for user and system management.
- Configured and managed network infrastructure including, VLANs, network devices, and ensuring reliable backup processes.
- Executed projects, including OneDrive/SharePoint migrations and developing custom solutions.
- Ensured system security and optimal performance by managing timely updates for servers and end-user devices.

1st/2nd Line Support Engineer - BCTEC

April 2021 - April 2022

- Provided daily support, resolving hardware, server, and software issues.
- Managed and secured core network and server infrastructure, performing server maintenance, wiring network cabinets, and configuring wireless access points.
- User and system administration utilizing Active Directory and Group Policy.
- Managed user requests in regards to use of Office 365 and SharePoint.
- Managed student and staff mobile devices using Lightspeed Mobile Device Management (MDM) and built and deployed new PC builds.

Telecommunications Engineer - Kelly Group

December 2019 - April 2021

- Wiring telephone poles & pcps
- Connecting copper cabling into customers houses ensuring perfect connectivity
- Wiring underground copper cables
- Troubleshooting issues with telephone connectivity issues

Education

Sandwich Technology 2008 - 2014

- GCSE - Business Studies (CC), English (C), Science(CC), Maths(C), Drama(C), Retail Knowledge (CCC), Food Technology (C)

Hadlow College 2014 - 2016

- Diploma L3 - Animal Management (Pass)

South Staffordshire College 2026 - 2027

- Diploma L5 - Web Development (Distinction)
